BLOX 50

Concrete enclosure surface

BLOX accumulation stoves are supplied with raw concrete cladding, which is intended for further processing. Raw concrete can show signs of irregular coloring, texture, or stains. These irregularities arise during production and work with raw material and cannot be influenced in any way. Following pictures are showing some possible deviations, which can occur:

If it is desired to achieve a uniform concrete appearance of the stove, it is necessary to paint the stove to give the surface a compact and complete appearance. For these purposes, we recommend HOXTER concrete paint.
